## Revenue Calculation and Rounding.

All revenue distributions are calculated in the smallest unit of the applicable currency (e.g., cents for USD). When a percentage-based calculation produces a fractional unit, the amount is rounded to the nearest whole unit using standard mathematical rounding. Because each participant's share is rounded independently, the sum of individual payouts may be up to one currency unit less per participant than the pre-split total. Any such remainder is retained by Storyliner as part of its role as the merchant of record. Storyliner will never disburse more than the net collected amount for any given transaction.
